

Dual Cleaning Mode Escalator Maintenance Machine

Edge-to-edge cleaning with dry sweep and wet wash options.

ERIClean's ES-515C is a professional-grade escalator maintenance machine designed for rapid on-site escalator cleaning. Its dual cleaning modes offer both dry scrubbing and wet washing to thoroughly and efficiently clean escalator surfaces edge to edge.

The ES-515C is extremely versatile and can be used on all types and makes of escalators, as well as moving walkways. Its high-quality, multi-level bristles are equally effective in heavy dirt or grease build up situations and for routine maintenance.

This stationary escalator cleaner is easy to use, lightweight, and features a convenient control panel with clearly marked predefined cleaning modes.

Dual Cleaning Modes

In dry mode, the specially designed brushes and 800W vacuum pump ensure that the escalator surface is left clean of debris, such as dust, sand, stones, dirt, foreign objects, and other particulates.

Choose the wet cleaning mode when the treads are heavily soiled or oils and grease have built up. Fill the 8L removable solution tank with ERIClean detergent and water and feel the power of the 350W brush motor as the multi-level bristles tackle the toughest of situations at 920 rpm.

Regardless of cleaning mode, all excess dry and wet material vacuumed from the tread is stored in the easily removable 12L recovery tank located on top of the housing.

ES-515C ESCALATOR MAINTENANCE MACHINE

SPECIFICATIONS

- DC Power Input: 110V 60Hz
- Recovery Tank Capacity: 12L
- Solution Tank Capacity: 8L
- Brush Width: 21 in
- Brush Speed: 920 rpm
- Brush Motor: 350W
- Vacuum Pump: 800W
- Water Flow Rate: 650mL/m
- Recovery Rate: >80%
- Weight: 154 lbs
- Dimensions: 34"x21"x44"

Why Choose ERIClean?

At ERIClean, we build commercial cleaning equipment that gets the job done. We invest in thoughtful designs and features that increase effectiveness and decrease the cost of operation.
